

## 400 kg olive oil production line, MINI400 model

The Olive Oil Press Machine 400kg Model MINI400 is an industrial machine designed for the production of olive oil with a nominal inlet seed capacity of 350-400 kg per hour. The machine itself consists of three 400kg olive oil presses, a control panel, and an 800kg washing and separating machine.

### Olive Oil Production Stages

Olive oil production in this machine is carried out in three stages:

1. **Washing and separation**
2. **Malaxation**
3. **Oil separation**

#### Stage 1: Washing and separation

In this stage, the olives are separated from the leaves and small branches and then washed with water to remove any dirt and dust.

#### Stage 2: Malaxation

In this stage, the washed olives are crushed and turned into a paste using a crusher. The olive paste must be crushed to a size that allows the oil to be easily separated from it.

#### Stage 3: Oil separation

In this stage, the oil is separated from the olive paste using a separator. The separator has a chamber that rotates at high speed. In this state, the oil is separated from the olive paste and is transferred to an oil tank through a pipe.

### Features of the Olive Oil Press Machine 400kg Model MINI400

- Nominal inlet seed capacity 350-400 kg per hour
- Equipped with three 400kg olive oil presses
- Equipped with a control panel
- Equipped with an 800kg washing and separating machine
- One month delivery
- Made in Iran
- Shipping nationwide

### Tips for producing quality olive oil

- Olives should be fresh and healthy.
- Olives should be processed during the olive harvest season.
- The olives must be washed properly to remove dirt and dust.
- The olive paste must be crushed enough for the oil to be easily separated from it.
- The olive oil must be quickly separated from the olive paste to preserve its quality.

### Technical specifications of the Olive Oil Press Machine 400kg Model MINI400

- Nominal inlet seed capacity: 350-400 kg per hour
- Nominal oil output capacity: 200-150 liters per hour
- Separator speed: 3200-4200 rpm
- Machine dimensions: 145280190 cm
- Machine weight: 1400 kg

### Applications of the Olive Oil Press Machine 400kg Model MINI400

This machine is used for the production of olive oil in small and medium-sized workshops and factories.
