

600 kg olive oil production line, MINI600 model

The Olive Oil Press Machine 600kg Model MINI600 is an industrial machine designed for the production of olive oil with a nominal inlet seed capacity of 600-550 kg per hour. The machine itself consists of three 600kg olive oil presses, a control panel, and an 800kg washing and separating machine.

Olive Oil Production Stages

Olive oil production in this machine is carried out in three stages:

1. **Washing and separation**
2. **Malaxation**
3. **Oil separation**

Stage 1: Washing and separation

In this stage, the olives are separated from the leaves and small branches and then washed with water to remove any dirt and dust.

Stage 2: Malaxation

In this stage, the washed olives are crushed and turned into a paste using a crusher. The olive paste must be crushed to a size that allows the oil to be easily separated from it.

Stage 3: Oil separation

In this stage, the oil is separated from the olive paste using a separator. The separator has a chamber that rotates at high speed. In this state, the oil is separated from the olive paste and is transferred to an oil tank through a pipe.

Features of the Olive Oil Press Machine 600kg Model MINI600

- Nominal inlet seed capacity 600-550 kg per hour
- Equipped with three 600kg olive oil presses
- Equipped with a control panel
- Equipped with an 800kg washing and separating machine
- One month delivery
- Shipping nationwide

Tips for producing quality olive oil

- Olives should be fresh and healthy.
- Olives should be processed during the olive harvest season.
- The olives must be washed properly to remove dirt and dust.
- The olive paste must be crushed enough for the oil to be easily separated from it.
- The olive oil must be quickly separated from the olive paste to preserve its quality.

Technical specifications of the Olive Oil Press Machine 600kg Model MINI600

- Nominal inlet seed capacity: 600-550 kg per hour
- Nominal oil output capacity: 200-150 liters per hour
- Separator speed: 3200-4200 rpm
- Machine dimensions: 4000x1500x2000 mm
- Machine weight: 1550 kg

Applications of the Olive Oil Press Machine 600kg Model MINI600

This machine is used for the production of olive oil in small and medium-sized workshops and factories.
