

35 mm NI8 (KK8) oil pulling machine

The 35mm Oil Press Machine (NI8(KK8 Model is a device that is used to extract oil from a variety of oilseeds. This machine uses the cold press method for oil extraction, which has many advantages over other oil extraction methods.

How the Machine Works:

In the cold press method, the oilseeds are subjected to pressure and the oil is separated from them. This method is done at low temperatures, which helps to preserve the natural properties of the oil.

Advantages of the Machine:

- **Uses the cold press method for oil extraction:** This method results in a completely natural and virgin oil that retains all the properties of the oilseed.
- **Can extract oil from a variety of oilseeds:** This machine can extract oil from a variety of oilseeds, including soft, medium, and hard seeds.
- **Easy to use and maintain:** This machine has a simple and user-friendly design and does not require any special skills to use. Additionally, the parts of this machine are of high quality and require little maintenance.
- **No need to add moisture to the seeds:** This machine uses dry seeds for oil extraction and does not require adding moisture to the seeds.
- **Very low power consumption:** This machine runs on household electricity and has a very low power consumption cost.
- **Can operate 24 hours a day:** This machine can operate 24 hours a day without the need for rest.
- **Adjustable operating speed:** This feature allows the user to adjust the operating speed of the machine according to their needs.
- **Has a shut-down function (emergency stop):** This feature increases the safety of the machine.
- **Beautiful design and easy to place and move:** This machine has a beautiful and modern design and is easy to place and move.

Applications of the Machine:

- Home use
- Creating home businesses
- Oil pressing shops in the presence of customers
- Herbalists
- Hypermarkets

Conclusion:

The 35mm Oil Press Machine (NI8(KK8 Model is an efficient and versatile machine that can be used for a variety of home and commercial applications. This machine uses the cold press method for oil extraction, which has many advantages over other oil extraction methods.
