

KM-LT130D digital liquid filling machine

Digital Liquid Filling Machine Model KM-LT130D: A Versatile and Advanced Solution for Filling Diverse Liquids

The Digital Liquid Filling Machine Model KM-LT130D stands out as a modern and sophisticated liquid filling solution, designed to handle a wide range of liquids within a volume range of 5 to 3500 milliliters. This machine is available in both single-nozzle and double-nozzle configurations and can be employed for filling liquids in various containers, including bottles, cans, cups, and bags.

Key Advantages of the Digital Liquid Filling Machine Model KM-LT130D:

- **Suitable for Filling a Variety of Liquids:** This machine can be utilized for filling diverse liquids with varying viscosities, such as water, oil, fragrances, essences, perfumes, and many more.
- **Versatility for Various Container Types:** The machine can accommodate containers of different sizes and shapes, ensuring adaptability to diverse packaging needs.
- **User-Friendly Operation:** Featuring a digital display and straightforward controls, the machine is effortless to operate, minimizing the learning curve for users.
- **High Filling Accuracy:** The machine delivers precise filling, ensuring that the exact desired volume of liquid is dispensed into each container.
- **Automatic Counting and Filling Control:** The machine's automatic counting feature keeps track of the number of filling cycles, while the filling control mechanism ensures consistent filling volumes.
- **Storage of Multiple Filling Programs:** The machine can store multiple filling programs in its memory, allowing users to quickly switch between different filling settings.
- **Anti-Drip Function:** The anti-drip function prevents liquid leakage after the filling process is complete, minimizing waste and maintaining a clean working environment.

Safety Precautions:

- **Thoroughly review the safety instructions before operating the machine.**
- **Avoid contact of liquids with skin and eyes.**
- **In case of liquid contact with skin or eyes, rinse immediately with copious amounts of water.**
- **If any malfunctions occur, cease operation and contact an authorized technician for assistance.**

Conclusion:

The Digital Liquid Filling Machine Model KM-LT130D emerges as a compelling choice for businesses seeking a versatile and advanced liquid filling solution. Its ability to handle a wide range of liquids, accommodate diverse containers, and offer precise filling with user-friendly operation makes it an ideal asset for various production settings.
