

## Pneumatic liquid filling machine model KM-PF3000

### KM-PF3000 Pneumatic Liquid Filling Machine: Industrial-Grade Filling for Various Liquids

The KM-PF3000 pneumatic liquid filling machine is an industrial-grade device designed for filling a wide range of liquids, including food, non-food, chemical, and sanitary liquids, across various industries. With a filling capacity of 500 to 3000 ml and a speed of 30 to 60 containers per minute, this machine proves to be a suitable choice for small and medium-sized businesses.

#### Advantages of the KM-PF3000 Pneumatic Liquid Filling Machine:

- **High Speed:** This machine can fill a container in a short period, minimizing time loss.
- **High Accuracy and Uniformity:** The machine precisely and uniformly fills liquid into containers, preventing product waste.
- **Ability to Fill Various Liquids:** It can handle liquids with low to medium viscosity.
- **Utilizes Replaceable and Washable Parts:** These parts ensure the machine remains clean and hygienic.
- **Full Compliance with GMP Standards:** The machine is manufactured in accordance with international health and safety standards.

#### Features of the KM-PF3000 Pneumatic Liquid Filling Machine:

- **Engineered Design for Easy Operation:** The machine features a user-friendly design, making it simple to operate.
- **Adjustable Piston Feeding Speed:** This allows for adjusting the filling speed based on the liquid type.
- **Capable of Filling in Any Container:** The machine can fill liquids into containers of various shapes and sizes.
- **Equipped with Drip Prevention System:** This system prevents dripping after filling the container.
- **Easy Cleaning and Maintenance:** The machine's parts are easily detachable and washable.
- **Simple Setup and Operation:** The machine is straightforward to install, set up, and operate.
- **Quick Connection and Disconnection of Pneumatic Parts:** The pneumatic parts are easily attached and detached.
- **Stainless Steel Hopper:** The stainless steel hopper facilitates the smooth transfer of liquid into the container.
- **Requires Single-Phase 220V Power Supply:** The machine operates on single-phase electricity.
- **Automatic and Manual Operation Modes:** The machine can function in both automatic and manual modes.

#### Conclusion:

The KM-PF3000 pneumatic liquid filling machine stands out as an industrial-grade device with comprehensive capabilities to cater to the liquid filling needs of small and medium-sized businesses. It offers high speed, accuracy, versatility in filling various liquids, and the use of replaceable and washable parts. Additionally, the machine adheres to international health and safety standards.
