

## KM-PF1000 pneumatic liquid filling machine

### **Pneumatic Liquid Filling Machine Model KM-PF1000**

The Pneumatic Liquid Filling Machine Model KM-PF1000 is a versatile and high-quality machine that is suitable for filling a wide variety of liquids, including food, non-food, chemical, and sanitary liquids. With a capacity of 100 to 1000 ml, it can be used for home, workshop, and industrial applications.

#### **Key features of this machine include:**

- **High filling speed:** The Pneumatic Liquid Filling Machine Model KM-PF1000 can fill up to 1000 ml of liquid per minute. This high speed allows for a quick and efficient filling process, minimizing downtime.
- **Ability to fill a variety of liquids:** The Pneumatic Liquid Filling Machine Model KM-PF1000 can accurately and consistently fill a wide variety of liquids, including food, non-food, chemical, and sanitary liquids. It can even handle thick, high-viscosity liquids with ease.
- **Constructed of high-quality materials:** The Pneumatic Liquid Filling Machine Model KM-PF1000 is constructed of high-quality materials that ensure the machine's durability and long life. The body and tank of the machine are made of stainless steel, which is fully compliant with GMP standards.

#### **Applications of the Pneumatic Liquid Filling Machine Model KM-PF1000 include:**

- Food and beverage producers
- Chemical and pharmaceutical manufacturers
- Workshops
- Stores

With the Pneumatic Liquid Filling Machine Model KM-PF1000, you can fill your liquids accurately, consistently, and hygienically. This machine is cost-effective for small and medium-sized businesses.
