BLF30*8

BLF30*8 Oil Filter Press: High-Efficiency Oil Filtration for Various Vegetable Oils

The BLF30*8 oil filter press is a high-quality and versatile machine designed for efficient filtration of various vegetable oils, including sesame, sunflower, rapeseed, and more. With a filtration rate of 10 to 20 liters per hour, this device effectively meets the needs of oil producers in their production lines.

Product Features:

- **High filtration rate (10 to 20 liters per hour):** Effectively filters large volumes of oil in a short time, enhancing productivity.
- **8 filter plates:** Provides ample filtration area to capture impurities, ensuring thorough oil cleaning.
- **Each filter plate measures 30*30 centimeters:** Suitable for filtering various oil types and viscosities.
- **Eliminates all solid particles and impurities:** Produces high-quality, clean oil that meets industry standards.

Benefits:

- **Crystal-clear and pure oil output:** Enhances the quality and taste of the final product.
- **Reduced oil filtration time:** Streamlines production processes and saves time.
- **Enhanced oil quality:** Ensures consistent product quality and customer satisfaction.
- **Increased sales and customer trust:** Delivers superior oil that meets consumer expectations.

Applications:

- **Home use:** Ideal for small-scale oil production or home-based oil pressing.
- **Workshop use:** Suitable for oil workshops and artisan oil producers.
- **Industrial use:** Can handle large-scale oil production requirements in industrial settings.

Affordable Price and High Efficiency:

The BLF30*8 oil filter press offers exceptional value for money, combining high performance with a cost-effective price. Its efficient filtration capabilities and durable construction make it a worthwhile investment for oil producers of all scales.
