

## ABT-CS4 model color sorter

### ABT-CS4 Color Sorter: A Powerful Sorting Machine for Enhanced Product Quality and Value

The ABT-CS4 color sorter is an advanced and powerful sorting machine designed to improve the quality and value of agricultural and food products. It boasts unique features that distinguish it from other sorting machines, including:

#### Key Features:

- **Sorting capacity:** 4-9 tons per hour
- **Versatile application:** Sorts various food and non-food grains such as wheat, barley, rice, corn, oilseeds, dried fruits, and more.
- **Precise sorting:** Separates grains based on color and size.
- **Reliable performance:** Ensures stable operation and high sorting accuracy.

#### Benefits:

- **Improved product quality:** Ensures the highest quality of your products by removing defects and impurities.
- **Increased value:** Enhances the market value of your products by meeting stringent quality standards.
- **Reduced costs:** Minimizes operational costs by reducing labor and material waste.
- **Enhanced safety:** Provides a safe working environment by eliminating manual sorting processes.

**The ABT-CS4 color sorter is a valuable investment for food and agricultural industries. It can significantly improve product quality, reduce costs, and enhance workplace safety.**
