

Powder ice machine 250 kg per day model FIC-A-2.5 Farsard brand

The FIC-A-2.5 Powder Ice Maker is a suitable ice maker for small fish and seafood stalls. This machine has the following features:

- Ice production capacity of 250 kg per day
- Ice outlet on the side of the machine
- Cabinet model
- Power consumption 12 amp single phase
- Water consumption 300 liters per day
- Dimensions 656575 cm³

This machine can produce 250 kg of ice per day, which can meet the ice needs of small fish and seafood stalls. The ice outlet on the side of the machine makes it easy to access the ice. The cabinet model of the machine gives the booth a *شیک و مدرن* appearance. The power consumption of 12 amp single phase makes this machine a suitable option for small booths. The water consumption of 300 liters per day keeps the water consumption of the machine at an acceptable level. The dimensions of 656575 cm³ make this machine suitable for installation in small booths.

This machine can be used to keep fish cold, ice fish, and store fish. The ice produced by this machine is of good quality and suitable for various uses. In the following, we will discuss each of the features of this machine and why you need to buy a powder ice maker:

Ice production capacity of 250 kg per day

This ice production capacity is sufficient for small fish and seafood stalls. With this machine, the ice needs of the booth can be fully met.

Ice outlet on the side of the machine

This feature makes it easy to access the ice. Therefore, the ice can be quickly and easily removed.

Cabinet model

By purchasing a cabinet ice maker, you give the booth a *شیک و مدرن* appearance. It also protects the machine from potential damage.

Power consumption 12 amp single phase

This power consumption is suitable for small booths. Therefore, this machine can be used without worrying about increasing electricity costs.

Water consumption 300 liters per day

This water consumption is acceptable. Therefore, by purchasing a powder ice maker, you can use this machine without worrying about increasing water costs.

Dimensions 656575 cm³

These dimensions make this machine suitable for installation in small booths.

Overall, the FIC-A-2.5 Powder Ice Maker is a suitable ice maker for small fish and seafood stalls. This machine has the following features:

- Ice production capacity of 250 kg per day
- Ice outlet on the side of the machine
- Cabinet model
- Power consumption 12 amp single phase
- Water consumption 300 liters per day
- Dimensions 656575 cm³

With these features, by purchasing a powder ice maker, you will have a suitable option for your small fish and seafood stalls.
