

Table top falafel with half rail, RN model, Novin Sanat

The Tabletop Falafel Maker Machine with Half Rail (Model RN) is a practical device for making falafel in processions and religious gatherings. This machine has an advanced mold cutter with excellent features and a full stainless steel half rail.

Main features of the device:

- **Full stainless steel half rail:** This half rail keeps the machine away from the heat source and fryer that is placed in front of it. This increases the safety of the machine and also improves the quality of the falafel.
- **Counting sensor:** This sensor counts the number of falafel made. This helps you keep track of your cooking statistics.
- **Falafel quantity adjustment system:** This system allows you to automatically mold the desired number of falafel.
- **Separate start and on/off keys:** These keys allow you to safely turn the machine on and off.
- **On/off switch protector:** This protector protects the on/off switch from possible damage.
- **Interchangeable mold:** This machine has interchangeable molds. This allows you to install various perforated molds on the machine.

Conclusion:

The Tabletop Falafel Maker Machine with Half Rail (Model RN) from iFoods is an excellent choice for you. This machine has a number of features that make it a great choice for establishments that need to make falafel in large quantities.
