

N110 granule weighing packaging machine

Granular Weighing Packing Machine: An Ideal Solution for Packaging Various Products

Introducing the Granular Weighing Packing Machine:

The Granular Weighing Packing Machine is an ideal solution for high-speed, fully automated packaging of a wide range of granular products, including sugar, grains, chips, nuts, and food items.

Technical Specifications:

Model: Two-scale and Four-scale

Speed:

Two-scale: 20 packs per minute

Four-scale: 20 to 30 packs per minute

Dimensions:

Length: 150 cm

Width: 130 cm

Height: 235 cm

Weight: 1000 kg

Capabilities:

- Packs a wide variety of granular products
- Equipped with an automatic fault detection system
- Features a PLC system with four international languages
- Delivers high-quality sealing and minimal error margins (up to milligram precision)
- Performs fully automated packaging without requiring specialized expertise
- Saves labor costs and enhances production efficiency

Sales Conditions:

Price: Negotiable

Payment Terms: 50% upfront, remaining balance within 3 months

Benefits of Purchasing:

- Affordable price
- Superior quality
- Easy operation
- High hygiene and safety standards
- Increased profitability
