

## Liquid filling machine with 4 automatic nozzles, model NIPK

The Automatic 4-Nozzle Tabletop Liquid Filling Machine Model NIPK TFM-120Y is a modern and advanced filling machine designed for filling various food, non-food, chemical, and sanitary liquids. It is made in Iran and has unique features that distinguish it from other filling machines.

### Applications:

This machine is mainly used for filling liquids such as beverages, detergents, oils, etc. It is widely used in the food, chemical, and pharmaceutical industries.

### Customization Capabilities:

This machine can be customized according to the customer's bottle sample. This capability allows the machine to be used for filling various bottle types. For example, if the customer has bottles with a special shape or non-standard size, the machine can be customized according to the customer's bottle sample.

### Easy Adjustment of Filling Volume:

This machine has a touch screen automation control system that allows easy adjustment of the filling volume. This capability allows products with different volumes to be filled with high accuracy.

### Robust Construction:

The whole body of this machine is made of 304 stainless steel. This robust body makes the machine resistant to corrosion and damage.

### Stable and Reliable Performance:

This machine has stable and reliable performance. This capability allows the machine to work continuously and without interruption.

### Easy Maintenance:

This machine has an ergonomic and simple design. This design makes it easy to maintain the machine.

### Compliance with International Standards:

This machine complies with the CE certification. This certification indicates that the machine is manufactured according to international safety and quality standards.

### Advantages of Using the Automatic 4-Nozzle Tabletop Liquid Filling Machine Model NIPK TFM-120Y:

Using this machine has several advantages, including:

- **Ability to fill various liquids:** This machine can fill various food, non-food, chemical, and sanitary liquids.
- **Easy adjustment of filling volume:** This machine has a touch screen automation control system that allows easy adjustment of the filling volume.
- **Stable and reliable performance:** This machine has stable and reliable performance and can work continuously and without interruption.
- **Easy maintenance:** This machine has an ergonomic and simple design and is easy to maintain.

### Conclusion:

The Automatic 4-Nozzle Tabletop Liquid Filling Machine Model NIPK TFM-120Y is a modern and advanced filling machine that can be used for filling various food, non-food, chemical, and sanitary liquids. It has unique features that distinguish it from other filling machines. Using this machine has several advantages and can be useful for various industries, including the food, chemical, and pharmaceutical industries.
