

4-nozzle automatic filling and capping

The Automatic 4-Nozzle Filling and Capping Machine by iFoods is a professional and efficient device designed for filling and capping various products in small and medium-sized packaging. This machine utilizes a rotary cylinder piston mechanism to enable automatic and high-precision product filling.

Unique Features:

- **PLC System and HMI Touchscreen:** This intelligent system provides complete control over the machine's operation and allows for the adjustment of desired parameters. The software also optimizes air pressure consumption, minimizing the machine's energy usage.
- **8 Bar Air Pressure and 250 Liter Compressor:** These features ensure smooth operation and enable accurate and high-speed filling and capping of products.

For example, suppose you are a manufacturer of new sauces. With the Automatic 4-Nozzle Filling and Capping Machine by iFoods, you can automatically fill your sauces with high precision and seal them tightly. This results in a high-quality product with no leaks or external contamination.

The machine's price is highly reasonable compared to its quality and performance. Therefore, by purchasing this device, you will have the most cost-effective solution for filling and capping your products.

The Automatic 4-Nozzle Filling and Capping Machine by iFoods is the professional and reliable equipment you need for your product filling and capping requirements. Visit the iFoods website for more information and to order your machine today. Take advantage of the exceptional price and benefits this product offers.
