

Filling machine with two hoppers, model GL2UZ100

The GL2UZ100 Dual Hopper Counting Filling Machine is a semi-automatic industrial machine designed for filling countable raw materials into various packaging formats. This machine is made in Iran and features high quality and performance.

Applications:

The GL2UZ100 Dual Hopper Counting Filling Machine is suitable for filling a wide range of countable raw materials, including:

- Pulses
- Grains
- Pasta
- Chocolate
- And more

This machine can be used for the production of high-quality products in the food, pharmaceutical, cosmetic, and hygiene industries, and other industries that require the filling of countable raw materials.

Features:

- Two separate hoppers for raw materials that are filled simultaneously
- A counting unit that counts the number of raw materials after they are filled
- Automatic packaging of the filled materials

Safety Precautions:

- Read the safety instructions carefully before using the machine.
- Keep the machine in a clean and dry place.
- Avoid placing the machine in water or moisture.
- Wear appropriate work clothes when working with the machine.

Maintenance:

- Clean the machine regularly.
- If any problems occur with the machine's operation, contact an authorized technician.

Conclusion:

The GL2UZ100 Dual Hopper Counting Filling Machine is a high-quality and efficient semi-automatic industrial machine that can be used for the production of high-quality products in various industries. This machine offers a number of advantages, including:

- High speed and accuracy
- High quality and performance
- Can be used for a variety of countable raw materials
- Affordable price

Recommendation:
