

Sesame and peanut butter making machine, NI model

Sesame and Tahini Making Machine Model NI

Description:

The Sesame and Tahini Making Machine Model NI is an Iranian industrial machine used to produce tahini and butter from sesame and other oilseeds. This machine has a production capacity of 15 kilograms per hour and can be used for home and industrial purposes.

Features:

- **Use of grooved roller stones:** The grooved roller stones ensure that the oilseeds are crushed evenly, producing tahini or butter with a soft and uniform texture.
- **Controlled speed of rotation of the roller stones:** The controlled speed of rotation of the roller stones ensures that the oil is completely extracted from the seeds, producing tahini or butter with an excellent taste and aroma.
- **Use of high-quality raw materials:** The use of high-quality raw materials, such as fresh and high-quality sesame, ensures the production of high-quality tahini or butter.
- **All-steel body:** The all-steel body makes the machine durable and easy to clean and maintain.
- **Powerful electric motor and gearbox:** The powerful electric motor and gearbox allow the machine to crush oilseeds quickly and efficiently, producing high-quality tahini or butter.
- **Low noise and easy operation:** The Sesame and Tahini Making Machine Model NI is low-noise and easy to operate.
- **Elegant and beautiful design:** The Sesame and Tahini Making Machine Model NI has an elegant and beautiful design.
- **Suitable for use at home, in stores, and in front of customers:** The Sesame and Tahini Making Machine Model NI is suitable for use at home, in stores, and in front of customers.
- **Lightweight and very easy to move:** The Sesame and Tahini Making Machine Model NI is lightweight and very easy to move.

This machine is a suitable option for workshops and factories producing tahini and butter. It is also suitable for use in stores and for offering tahini and butter in front of customers.

Here are some of the advantages of this device:

- **Unparalleled quality of tahini produced:** The tahini produced by the Sesame and Tahini Making Machine Model NI has a soft and uniform texture, excellent taste and aroma, high nutritional value, high purity, and long shelf life.
- **High production speed:** The Sesame and Tahini Making Machine Model NI can produce 15 kilograms of tahini per hour.
- **Easy operation:** The Sesame and Tahini Making Machine Model NI is very easy to operate and does not require any special skills.
- **Suitable for home and industrial use:** The Sesame and Tahini Making Machine Model NI can be used for home and industrial use.
- **Reasonable price:** The Sesame and Tahini Making Machine Model NI is offered at a reasonable price.

Overall, the Sesame and Tahini Making Machine Model NI is a high-quality and efficient industrial machine that is a good option for producing tahini and butter for home and industrial use.
