

## MB electric powder and granule sachet packaging behind stitching

### Electric Sachet Packaging Machine for Powder and Granules, Back-Sealing Model MB

#### Description:

The Electric Sachet Packaging Machine for Powder and Granules, Back-Sealing Model MB is an automatic Iranian packaging machine used for filling various powdered and granular materials in a weight range of 1 to 1000 grams.

#### Features:

- **12-month warranty:** The machine has a 12-month warranty from the manufacturer. This warranty assures the user of the quality of the machine and its after-sales service.
- **Intelligent control panel:** The machine has an intelligent control panel that makes it very easy to use. This control panel has a touch screen and control buttons that can be used to make precise settings for the machine.
- **Beautiful design:** The machine has a beautiful and modern design that can beautify your work environment.
- **Suitable placement:** The machine has suitable dimensions and weight and is easily portable.
- **Optimal speed:** The machine has a high packaging speed and can package up to 15 sachets per minute. This high speed increases productivity and reduces production costs.
- **Easy operation:** The machine is easy to operate and does not require any special skills to use it.
- **Cheap and fast repairs:** The machine has high-quality and affordable spare parts and accessories, and in case of any problems with the machine's performance, it can be repaired quickly and at a low cost.
- **Reasonable price:** The machine is available at a very reasonable price compared to similar foreign machines.
- **Sealing type:** The machine is of the back-sealing type. This type of packaging creates a firm and durable seal that prevents material leakage.
- **Raw materials:** The machine is suitable for filling various powdered and granular materials such as sugar, coffee, Nescafe, flour, spices, pepper, cinnamon powder, خاکشیر, sesame, rice, lentils, chickpeas, beans, and etc.
- **System:** The machine is electric. This type of system makes the machine run smoothly and quietly.
- **Number of hoppers:** The machine has dynamic hoppers. These hoppers are adjusted according to the weight and volume of the materials, increasing filling accuracy and speed.
- **Measuring unit:** The machine uses the gram unit to measure the weight of materials.
- **Application:** The machine is used for packaging various powdered and granular materials in various industries such as food, cosmetics and personal care, pharmaceuticals, and chemicals.

#### Conclusion:

The Electric Sachet Packaging Machine for Powder and Granules, Back-Sealing Model MB is an automatic Iranian packaging machine with many features that make it a suitable option for various industries. The machine has a 12-month warranty, intelligent control panel, beautiful design, suitable placement, optimal speed, easy operation, cheap and fast repairs, and reasonable price.
