

Packaging of electric powder and granule sachets, three-sided stitching, model M

Electric Sachet Packaging Machines, Three Side Sealing Model M Description:

Electric Sachet Packaging Machines, Three Side Sealing Model M are automatic packaging machines used for filling and packaging various powdered and granular materials in a weight range of 1 to 1000 grams.

Features:

- **Intelligent control panel:** These machines have an intelligent control panel that allows for precise adjustment of the amount of material filled into each sachet.
- **Beautiful design:** These machines have a beautiful and modern design that will make them look great in your work environment.
- **Suitable placement:** These machines are designed to take up minimal space and can be easily placed in your work environment.
- **Optimal speed:** These machines operate at an optimal speed and can package 5 to 15 sachets per minute in different models.
- **Sealing type:** These machines are of the three-side sealing type, which creates a strong and durable seal.
- **Raw materials:** These machines are suitable for filling various powdered and granular materials such as sugar, coffee, Nescafe, flour, spices, pepper, cinnamon powder, خاکشیر, sesame, rice, lentils, chickpeas, beans, and etc.
- **System:** These machines use an electrical system.
- **Number of hoppers:** These machines have a dynamic number of hoppers that allow the use of various types of sachets.

Applications:

These machines can be used for various industries such as food, cosmetic and personal care, pharmaceutical, and chemical industries.

Benefits:

- **Increased efficiency:** These machines can help you package your products quickly and accurately with high quality.
- **Reduced costs:** By using these machines, you can reduce your packaging costs and improve your bottom line.
- **Improved product quality:** These machines create a strong and durable seal that protects your products from air and moisture, ensuring a longer shelf life.
- **Increased flexibility:** These machines can be used for a variety of products and packaging materials, giving you the flexibility to meet your specific needs.
