

Packaging of pneumatic sachets of powder and granules behind sewing model RB

Pneumatic Sachet Packaging Machine for Powder and Granules (Model RB)

Description:

The Pneumatic Sachet Packaging Machine for Powder and Granules (Model RB) is an efficient and high-quality machine used for filling and packaging various powdered and granular materials in a weight range of 1 to 5000 grams. This machine is made in Iran and is of high quality.

Features:

- **Stainless steel body:** The machine has a stainless steel body that makes it resistant to corrosion and wear. The stainless steel body also makes the machine hygienic and clean.
- **Pneumatic system:** The machine works using a pneumatic system that requires an air compressor. This system allows the machine to package materials with high accuracy and speed. The system also makes the machine low-noise.
- **Back-sealing:** The machine has a back-sealing type that makes the packaging firm and durable. This type of sealing also protects the packaged materials from air and moisture ingress.
- **Suitable for various materials:** The machine can be used to package various powders and granules such as sugar, coffee, Nescafe, flour, spices, pepper, cinnamon powder, خاکشیر, sesame, rice, lentils, chickpeas, beans, and etc.

Benefits:

- **Improved efficiency:** The machine can help improve productivity and reduce production costs.
- **High quality:** The machine is made of high-quality materials and components, ensuring long-term durability and reliability.
- **Versatile:** The machine can be used for a wide range of powdered and granular materials, making it a versatile packaging solution for various industries.
- **Easy to use:** The machine is easy to operate and maintain, making it a user-friendly option for businesses of all sizes.

Applications:

The Pneumatic Sachet Packaging Machine for Powder and Granules (Model RB) is suitable for various industries, including:

- **Food industry:** The machine can be used to package food products such as coffee, tea, spices, snacks, and etc.
- **Pharmaceutical industry:** The machine can be used to package pharmaceutical products such as powders, capsules, and tablets.
- **Chemical industry:** The machine can be used to package chemicals such as powders, granules, and liquids.
- **Cosmetic and personal care industry:** The machine can be used to package cosmetic products such as powders, creams, and lotions.
- **Industrial applications:** The machine can be used to package various industrial products such as powders, granules, and liquids.
