

## **Packaging of pneumatic sachets for thick liquids, model RZ, on three sides**

Section 1: Thick liquid filling and packaging machine is an industrial equipment used for filling and packaging of viscous and liquid materials. This machine has two customizable sealing models, including three-side sealing and back sealing. Thick liquid packaging can include products such as liquid pouches, honey pouches, lemon juice pouches, butter pouches, tahini pouches, oil pouches, fruit juice pouches, and honey filling and packaging. Depending on the type of packaging required, this machine is available in different capacities.

Section 2: Features of Thick Liquid Filling and Packaging Machine

Thick liquid filling and packaging machine has features that make it suitable for use in various industries. One of the features of this machine is its customization capability, which allows customers to fill and package their products with three-side sealing or back sealing. Additionally, the machine is available in different capacities, which allows manufacturers to package their thick liquids in the desired size.

Section 3: Applications of Thick Liquid Filling and Packaging Machine

Thick liquid filling and packaging machine has a wide range of applications in various industries. With the use of this machine, viscous liquids such as honey, lemon juice, butter, tahini, oil, and fruit juice can be packaged tightly and accurately. This machine is suitable for businesses that need to fill and package large volumes of viscous liquids and impress their customers..

## **Packaging of pneumatic sachets for thick liquids, model RZ, on three sides**

Additionally, the use of this machine in the food and beverage industry, such as honey filling and packaging, liquid pouch packaging, and fruit juice packaging, is very important to keep products well preserved during storage.

### **Section 4: Benefits of Using Thick Liquid Filling and Packaging Machine**

Using thick liquid filling and packaging machine has benefits for various businesses. This machine saves time and labor and automatically fills and packages liquids.

Here is a more concise translation:

#### **Thick liquid filling and packaging machine**

This machine is used to fill and package viscous and liquid materials. It has two types of sealing: three-side sealing and back sealing. It is available in different capacities to meet the needs of different industries.

#### **Features**

Customizable sealing

Available in different capacities

#### **Applications**

Packaging viscous liquids such as honey, lemon juice, butter, tahini, oil, and fruit juice

Used in the food and beverage industry

#### **Benefits**

Saves time and labor

Automatically fills and packages liquids.
