

Back-stitched sachet packaging machine for non-matching materials, RLB pneumatic model

The Pneumatic Sachet Packaging Machine for Countable Materials with Back Seal is a machine used for packaging small and light materials such as electronic components, screws and nuts, rivets, metal fittings, and various countable drugs such as tablets and capsules. With its pneumatic system, this machine also allows for the packaging of heavy-weight packages. The number of items in each package is set by a counter. This counter can be set from 1 to 100 items.

Features

- Use of pneumatic system: This system ensures long-term operation and high accuracy for the machine.
- All-steel body: This body increases the strength and durability of the machine.
- 12-month warranty: This warranty is a testament to the high quality of the machine.
- Smart control panel: This control panel makes it easy to operate the machine.
- Beautiful design: This design makes the machine look attractive and increases its appeal to customers.
- Suitable placement: This placement makes it easy to use and repair the machine.
- Optimal speed: This speed increases the productivity of the machine.
- Easy operation: This operation reduces the need for employee training and increases productivity.
- Cheap and fast repairs: This feature reduces repair costs for machine owners.
- Excellent accuracy: This accuracy ensures the quality of the final product and reduces waste.
- Affordable price: This price makes the machine more accessible to business owners.

Applications

This machine is suitable for various industries, including food, pharmaceutical, cosmetics and personal care, and industrial. The use of this machine increases the accuracy, speed, and ease of packaging materials.

Benefits of Using the Machine

- **Increased accuracy:** This machine has high accuracy in counting and packaging materials due to its pneumatic system. This accuracy ensures the quality of the final product and reduces waste.
- **Increased speed:** This machine packages materials at high speed. This speed increases productivity and reduces production time.
- **Ease of use:** This machine has a simple and user-friendly design. This design makes it easy to use and reduces the need for employee training.
- **Reduced costs:** Using this machine reduces production, repair, and labor costs.

Conclusion

The Pneumatic Sachet Packaging Machine for Countable Materials with Back Seal is a high-quality machine with the right features for packaging countable materials. Using this machine increases the accuracy, speed, and ease of packaging materials and can be useful for various industries.
