

Venus home kebab maker

A manual kebab maker is a simple and efficient tool used to cook kebabs outdoors. This device is very suitable for camping and long trips because it does not require electricity or batteries. Manual kebab makers are often made of metal

How to Use a Manual Kebab Maker

To use a manual kebab maker, first place a plastic sheet at the bottom of the kebab mold. Then, add the ground meat to the mold and insert the skewer into the center of the meat with a little pressure. Finally, press the lever on the kebab maker from top to bottom to squeeze the meat onto the skewer. Your kebab is now ready to cook
