

ISP Replacement soy isolate stabilizer, Rehiab brand

ISP Replacement is a new product from **Rahna (Rayavar)** that is offered as an affordable substitute for soy isolate in the production of meat products. This product, with all the features of soy isolate, such as high water and oil absorption, proper texture formation, and freshness preservation, can improve the quality and shelf life of meat products.

Features of Soy Isolate Replacement Powder

High water and oil absorption: **ISP Replacement** powder is capable of absorbing water and oil present in meat products evenly. This prevents meat products from becoming dry and crumbly and increases their shelf life.

Proper texture formation: **ISP Replacement** powder can help form a compact and uniform texture in meat products. This improves the flavor and taste, and increases the shelf life of meat products.

Freshness preservation: **ISP Replacement** powder can preserve the water and fat present in meat products. This keeps meat products fresher and more durable, and improves the product's palatability.

Advantages of Using Soy Isolate Replacement Powder

Reduced production costs: **ISP Replacement** powder is priced lower than soy isolate. This can help reduce the cost of producing meat products.

Improved quality of meat products: **ISP Replacement** powder can improve the quality of meat products in terms of texture, flavor, and taste, and shelf life.

Increased shelf life of meat products: **ISP Replacement** powder can help increase the shelf life of meat products by removing free water available to microorganisms.

Where to Buy

You can purchase **ISP Replacement** powder at a reasonable price and online from the **iFoods** website. By using this product, you can enjoy all the benefits of soy isolate and at the same time save on production costs and increase your profits.

Summary

ISP Replacement powder is an affordable solution for meat product manufacturers that can improve the quality and shelf life of their products. By using this product, you can produce a high-quality and economical product.
