

Bone and frozen meat cutting machine model C/E182

The C/E182 bone saw is an efficient and cost-effective machine for cutting frozen bones and meat. It can be used to cut various types of bones and meat, including beef, lamb, fish, and steaks. The machine features high cutting speed and high cutting accuracy, which helps to save time and energy and improve cutting quality.

The main features of the C/E182 bone saw include:

- 1.1 kW strong motor
- High cutting speed (16 meters per second)
- High cutting accuracy
- All-steel body
- Stainless steel blade
- Two cutting speeds
- Safety system
- Meat pieces do not stick
- Affordable price

The C/E182 bone saw is a suitable choice for butcher shops, restaurants, meat production factories, and other meat-related industries. With its high cutting speed and high cutting accuracy, this machine can help save time and energy, as well as improve cutting quality.

In addition to the features mentioned above, the C/E182 bone saw also has the following advantages:

- Longer machine life
- High resistance
- Time saving
- Easy transportation

Overall, the C/E182 bone saw is an efficient, cost-effective, and high-quality machine that can meet the needs of users in the field of bone and meat cutting well.
