

Uranus hand hamburger maker

Hamburger is one of the most popular fast food dishes in the world. But making a delicious and uniform hamburger is not that easy. If you don't shape the hamburger properly, the outer parts may overcook and the inner parts may remain raw.

The Uranus hamburger maker is a small and simple device that can help you make delicious and uniform hamburgers. This machine uses a metal mold to shape ground beef into a circle or square.

Material and size of Uranus hamburger maker

The Uranus hamburger maker is made of drawn iron profile and is produced in two sizes of 15 and 17 centimeters. The stainless steel model of this machine has a polished and nickel-chrome plating, and the colored model is covered with electrostatic powder coating.
